

THE ODDS

MOD	FAIL	COST	CLEAN
−3	72%	22%	6%
−2	64%	26%	10%
−1	55%	30%	15%
+0	45%	34%	21%
+1	36%	36%	28%
+2	28%	36%	36%
+3	21%	34%	45%

2d10 runs flatter than 2d6. The tails are fat — a good mod swings hard, a bad one damns you. At +0 you fail nearly half the time. Nobody is safe.

BROKEN

At 0 HP or below, roll d4. Nothing here kills you on the spot.

1 · OUT COLD Out of the fight. You come round at d4 HP.

2 · MAIMED A limb breaks or comes off (d6: a 6 takes an eye). Out of the fight, then d4 HP.

3-4 · BLEEDING Haemorrhage.

HAEMORRHAGE

Every roll you make is at disadvantage. Roll d2. That is your clock. It ticks on your own rolls while something presses you, on hours while nothing does. Lie still and it stops. When it runs out you bleed to death, unless someone closes the wound.

MORALE

The GM rolls 2d6 against a creature's Morale when its leader dies, half its group is down, or a lone enemy drops to a third of its HP. Roll over and it breaks. Then d6: on 1–3 it runs, on 4–6 it surrenders. Mindless things never check.

WHAT STAYS FROM THE BOOK

Scvm and classes. Gear, weapons, scrolls. Omens. Broken. The bestiary. Reaction and Morale. Getting better. Every random table. **Only the player's dice change.**

A 2010 HACK FOR MÖRK BORG

The Bell Tolls

2010

For the Masters of Ceremonies spawned by the Apocalypse.

Say **what you do**. If it's in doubt and can bite, roll 2d10 + mod. Read the band and live with it.

- † d20 against a DR becomes 2d10 read as bands.
- † Difficulty ratings are gone. There is no number to hit.
- † Monsters never roll. One exchange settles it.
- † Damage is flat. Armor subtracts.

ROLL · READ THE BAND · LIVE WITH IT

FIGHTING

Monsters don't roll.
One 2d10 + mod settles the exchange.

≤10	MISS & GET HIT Your blow fails, theirs lands. Take the wound.
11-14	TRADE BLOWS You both connect. Deal your harm, take theirs.
15+	CLEAN HIT You land it. They don't touch you.

Fight with what you are. The fiction gates the stat. No finesse while pinned.

STRENGTH	Overpower. Grapple. Heavy weapons.
AGILITY	Outmaneuver. Skirmish. Knives. Leap aside when the rock falls.
PRESENCE	Command. Aim. Anything ranged.
TOUGHNESS	Kills nothing. Decides how much dying you can take.

HARM

A hit deals its weapon's **maximum**, less armor. You never roll for damage. No bare numbers. The wound is described in the fiction, then HP drops. A number alone is never the consequence.

ARMOR

LIGHT	Removes 1 damage. Advantage on Agility rolls.
MEDIUM	Removes 2 damage.
HEAVY	Removes 3 damage. Disadvantage on Agility rolls.

CRIT & FUMBLE

Read the two dice you keep, before your mod. **Natural 19 or more**: shred their armor a tier, then double the damage. **Natural 3 or less**: your own armor shreds a tier, and the harm to you doubles. Armor lost stays lost.

SCROLLS

Cast with 2d10 + Presence. You get Presence + d4 castings a day.

≤10	Misfire. It fails. Take d2 damage and go dizzy. No scrolls for an hour.
11-14	It works, but the scroll takes something. A wound, an Omen, or itself.
15+	Clean. It works, no cost.

THE ROLL

Roll 2d10 + ability mod.
Read the band.

≤10	YOU FAIL Something bad happens and the world moves against you.
11-14	COST You do it, but the situation bites back — a price, a complication, a piece of you left behind.
15+	CLEAN You do it. No strings.

WHEN TO ROLL

- † Only when the outcome is in doubt and failure has teeth.
- † Difficulty is framing. Zoom in, change the stakes or the fiction. Leave the number alone.
- † Impossible stays impossible until the plan changes.

ABILITIES - -3 TO +3

STRENGTH	Crush, lift, strike, grapple. Overpowers.
AGILITY	Dodge, flee, balance, climb, swim. Outmaneuvers.
PRESENCE	Perceive, aim, charm, wield scrolls. Commands.
TOUGHNESS	Resist poison, cold, heat. Survive falling. Sets your HP.

SWING THE ODDS

Disadvantage — hurt, blind, cornered, bleeding: roll 3d10, keep the lowest two. Haemorrhage and its kin work this way, with no rising DR to track.
Advantage — set up, flanking, the right tool: roll 3d10, keep the highest two.

Each is worth about ±3. Two advantages are still one advantage. Advantage and disadvantage cancel.

OMENS

Spend one to:

- † treat this hit as a crit;
- † halve the damage dealt to you;
- † bump one band up.

No Omen undoes a natural 3 or 19. You may halve a fumble's damage, but your armor still shreds and the exchange is still lost.
